MUHAMMAD SHAHBAZ

Frontend & Web Developer — HTML5 · CSS3 · JavaScript · React · eCommerce

shahbaz21042005@gmail.com • +92 336 3600215 • github.com/Shahbaz2104 • Karachi, Pakistan

PROFILE

Frontend and web developer with 1+ year of professional experience building responsive, production-grade web applications and teaching modern web development. I have shipped storefront-style marketing sites, filterable product catalogs, admin dashboards, and payment flows using **HTML5, CSS3, JavaScript, React, and Next.js**, with working knowledge of WordPress and hands-on Stripe Checkout, SEO, accessibility, and mobile-first UI work. Comfortable across the eCommerce workflow — product data, inventory, billing, and payments — and eager to apply this foundation to Shopify theme development and Liquid.

TECHNICAL SKILLS

Web & eCommerce: HTML5, CSS3, JavaScript (ES6+), Responsive & Mobile-First Design, WordPress, SEO, Web Accessibility, Product Catalogs, Inventory & Billing Workflows, Stripe Checkout & Webhooks

Shopify: Liquid and theme development (currently learning)

Frontend: React.js, Next.js, React Native (Expo), Tailwind CSS, Framer Motion, TanStack Query, Redux, Zustand

Backend: Node.js, Express.js, Laravel, REST APIs, JWT, Better Auth, MVC Architecture

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Firebase, Prisma ORM, Drizzle ORM

Languages: JavaScript, TypeScript, PHP, Python, SQL, Rust

Testing & Tools: Vitest, Jest, Supertest, Playwright, Zod, Git/GitHub, Docker, Vercel, Postman

Languages Spoken: English (Fluent), Urdu (Native), German (A2), Japanese (N5)

WORK EXPERIENCE

Programming Instructor | Aptech

Jun 2025 – Oct 2026

- Deliver hands-on, project-based training in HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, PHP, Laravel, and modern CSS frameworks to 100+ beginner and intermediate students.
- Teach responsive, mobile-first layouts, semantic HTML, CSS architecture, browser debugging, and Git/GitHub workflows; review student code for usability, accessibility, and maintainability.
- Guide students through database design, SQL, and the full SDLC — planning, UI/UX, system design, testing, and deployment.
- Design capstone projects that simulate client briefs and run supplementary Excel/data-analysis training for business applications.

PROJECTS

Titan Fitness — AI-Powered Gym Management Platform | Personal Project

Live: titan-fitness-navy.vercel.app/

- Built a conversion-focused marketing site (programs, trainers, pricing, testimonials, FAQ) plus 16 member dashboard pages, 11 admin pages, and 95+ REST API routes.
- Integrated Stripe Checkout, coupons, and webhooks for membership payments; added admin tools for managing plans, members, classes, coupons, and content.
- Delivered a responsive, mobile-first UI with SEO metadata, PWA support, and AI features backed by rule-based fallbacks.
- Implemented OTP email verification, Google OAuth, role-based access control, and web-push notifications for member and admin accounts.

Stack: Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Stripe, Better Auth, OpenAI

BIOSAF Enterprises — Corporate Website, Product Catalog & Admin Dashboard | Client Project

Live: client-nine-gamma-23.vercel.app/

- Delivered a production marketing site with a searchable, filterable product catalog, industry pages, case studies, and quote/contact forms.
- Built a JWT-protected admin dashboard with full CRUD for products, categories, blogs, projects, testimonials, FAQs, and inquiries, validated with Zod.
- Improved SEO, accessibility, responsive behavior, and load performance; fixed an App Router navigation rendering bug verified with Playwright.

Stack: Next.js, TypeScript, Tailwind CSS, Prisma, MySQL, JWT, Zod, Framer Motion

Hospital Management System — Enterprise Operations Platform | Personal Project

Live: hospital-management-system-wheat-beta.vercel.app/

- Built a 27-module platform covering patients, appointments, pharmacy inventory, billing, insurance claims, HR/payroll, and role-based dashboards.
- Implemented billing/invoice and pharmacy stock workflows with transactional Prisma writes, PDF/Excel/QR exports, and Stripe online payments and refunds.
- Enforced granular RBAC for 9 roles across UI and API, with audit logs, responsive data tables, and a consistent enterprise design system.
- Integrated Cloudinary uploads for medical records and hospital branding, with purpose-based size and file-type limits.

Stack: Next.js, TypeScript, Tailwind CSS, Prisma, MongoDB, JWT, Stripe, Cloudinary, React Query

Expense Tracker Pro — Personal Finance & Budgeting App | Personal Project

- Built a full-stack finance tracker with transaction CRUD, advanced filters, monthly budgets, multi-currency reports, and cookie-based auth.
- Added all-or-nothing CSV import/export with row-level validation and exact decimal money handling; 164 automated tests across Rust and React.
- Designed a REST API with filtering, sorting, pagination, per-user query scoping, and CSV formula-injection protection.

Stack: Rust, Axum, SQLite, React, TypeScript, Tailwind CSS, TanStack Query

Nihongo Lab — Japanese Learning Platform | Personal Project

Live: nihongo-lab-nu.vercel.app/

- Built a responsive Next.js platform with 8,334 vocabulary words, 2,211 kanji, stroke-order practice, quizzes, and a from-scratch SM-2 review engine.
- Implemented server-rendered dataset pages, Prisma/SQLite persistence, and 73 unit tests.
- Built an offline-first reading engine with a custom Japanese tokenizer, hover furigana, browser TTS, and 100 grammar points.

Stack: Next.js, React, TypeScript, Tailwind CSS, Prisma, SQLite, Framer Motion

PulseWatch — Uptime Monitoring Platform | Personal Project

- Built a full-stack monitoring console that schedules URL checks, tracks latency and incidents, and serves REST reports with charts and CSV export.
- Hardened SSRF/DNS handling and added transactional incident state plus webhook/email alert delivery, covered by 187 tests.
- Built a React operations console with a command palette, live polling, latency charts, uptime strips, and dark/light themes.

Stack: Rust, Axum, SQLite, React, TypeScript, Tailwind CSS, TanStack Query, Recharts

SehatSathi AI — AI-Powered Healthcare Assistant | Personal Project

- Built a cross-platform mobile app with AI chat, medical-report summaries, medicine reminders, emergency SOS, family profiles, and English/Urdu support.
- Integrated Firebase Auth/Firestore, Expo notifications, location, image picker, and SMS for reminders and emergency alerts.

Stack: React Native, Expo, TypeScript, Firebase, NativeWind, OpenAI API

ASHRAE Building Energy Prediction — Machine Learning Project | Personal Project

GitHub: github.com/Shahbaz2104/me446-ashrae-energy

- Predicted hourly commercial-building energy use on 1M+ rows; compared Linear Regression, Random Forest, and HistGradientBoosting (test R^2 0.97) and shipped a Streamlit dashboard.
- Engineered a reproducible pipeline with time-ordered splits and leakage controls; documented metrics and limitations in a technical report.

Stack: Python, pandas, scikit-learn, Streamlit, Tableau-ready datasets

EDUCATION

Advanced Diploma in Software Engineering | Aptech — Nov 2022 – Jan 2025

B.E. Mechanical Engineering | NED University of Engineering and Technology — Oct 2023 – Jun 2027 (In Progress)
